

Client Specifications

Client Software Requirements

- Windows 7 Pro (32-bit or 64-bit) ¹
- Microsoft.NET Framework 4.0
- Adobe Reader 8+

Client Hardware Requirements

- Intel Dual Core 2GHZ+
- 4GB Memory
- 80GB hard drive
- On-board 10/100/1000 Ethernet NIC
- On-board video, supporting minimum 1024 x 768 resolution
- 1 USB 2.0 port (*Additional USB ports may be required for printers, cameras etc..)

Mobile Phone Face Search

- iPhone, Android, Blackberry, Windows phone
- Camera with 5MP or greater resolution
- Data plan with email capabilities
- POP3 or IMAP capable email server ²

Server Specifications

Application Server Software Requirements

- Windows Server 2008/2012 (64-bit)
- Microsoft.NET Framework 4.5
- Server roles: Web Server (IIS), Application Server

Biometric Matching Server Software Requirements

- Same as Application Server

Database Server Software Requirements ³

- SQL Server 2005/2008/2012 (Express editions also supported) or Oracle 10g/11g

File Share Requirements ⁴

- Local hard drive, SAN, or NAS

Application Server Hardware Requirements ⁵

- Dual Core 2GHZ+
- 4GB Memory
- 50GB hard drive
- On-board 10/100/1000 Ethernet NIC

Biometric Matching Server Hardware Requirements

- Same as Application Server

Important Notes

¹ 32-bit OS required for legacy PictureLink Desktop versions.

² Email server is only required for mobile phone searches.

³ The PositiveID+ databases can be installed on an existing database server. A dedicated database server is not required.

⁴ A file share is required for storage images. Please consult with Dynamic Imaging Systems for estimates on file storage requirements.

⁵ Virtual servers are supported but must be configured with a minimum of two (2) virtual CPU's.
